Prescription Drug Monitoring Program (PDMP)

The Alabama Department of Public Health (ADPH) Meaningful Use (MU) team recently added a new functionality where Eligible Providers who are currently participating in the PI Program can access the PDMP registry and run reports to show that they are actively engaged with this Specialized Registry during the reporting period. This documentation is required to meet the Public Health objectives and measures and can be submitted with the EP's application for the Program Year for which they are attesting.

If you have technical issues with accessing and generating this report, please contact ADPH Helpdesk at 1-855-925-4767, Option 1.
